DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/18/06 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 5, 7-15, 17, and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Egawa et al (5,534,944) for the same reasons as set forth in Section 2 of the previous office action, dated 10/19/05.

Response to Arguments

4. Applicant's arguments filed 5/18/06 have been fully considered but they are not persuasive. Applicant asserts on pages 7-9 of the Remarks that Egawa et al fails to disclose encoding of the second stream matches the first stream. However, applicant concedes that Egawa et al discloses that when STREAM1 is spliced to STREAM2, they are matched (i.e. R2=R2), in the same way that STREAM2 is spliced to STREAM1.

Art Unit: 2621

Again, they are matched (i.e. $R1=R1$). Therefore, one of ordinary skill in the art would have had no difficulty in recognizing that if the encoding profiles match at either R1 or R2, they meet the claim limitation.
